- The S.E.E. program has won five US national awards and an international award for excellence.
- The S.E.E. program is so comprehensive that it has been called encyclopedic.

Understanding epilepsy is essential.

- Understand the effects of epilepsy on learning and behaviour.
- Learn about common mistakes in treating epilepsy and how to avoid them
- Recognize toxicity
- Manage medications the RIGHT way
- Get effective control without side effects
- Review eight new medications for seizures
- Explore what to do when medications don't work
- Learn to watch for side effects of anti-seizure medications
- Learn how to avoid "breakthrough seizures"
- Review what happens in the brain during seizures
- Understand different types of seizures
- View "No Longer the Last to Know," a videotape about different seizures
- Learn about seizures and memory

Other treatments for epilepsy, first-aid for epilepsy, and prognosis

- Hear about surgery, vagus nerve stimulation, and Diastat
- Learn about the Ketogenic Diet, biofeedback, and other "cures"
- Hear about new research and amazing 21st century treatments, like brain stimulation
- Discover emerging genetic approaches to epilepsy treatment
- Learn about the prevention of seizure triggers
